Plant a Small Orchard this Spring **ALL DWARF TREES**

DWARF APPLE TREES

These trees are not new with us. Some 15 odd years ago we started growing them from Mallings stock secured from N. Y. State Experiment Station. We offered them for sale, the first of their kind sold in the United States. They are without question the "perfect" tree for the lawn or garden. Be sure to plant them so that the **bud union is at least 2 inches above ground.**

PRICE: 2-yr., large, 3-4 ft., \$3.75 each; 3 for \$10.50.

FULL DWARF

(Malling IX Root stock.) Bears fruit usually first year set. Height at maturity, 6 ft. Very popular for lawn and orchard. Plant 10-12 ft. apart.

SEMI-DWARF

(Malling I Root stock.) Sturdier tree than No. IX. Bears second year after planting. 10-12 ft. at maturity. Plant 15 ft. apart.

We can furnish the following varieties in either of the above types:

Double Red Delicious	Red Northern Spy	Yellow Transparent
Early McIntosh	Rogers McIntosh	

We can furnish the following varieties in the semi-dwarf only:

Cortland	Lodi	Yellow Delicious

DWARF PEAR TREES

Dwarf Pear Trees are also a very valuable addition to any lawn or garden. Like the Apple, it is a low growing tree. Fruit is easily accessible from the ground and the fruit is large standard size. 15 ft. at maturity. Plant 12 ft. apart.

PRICE: 2-yr., large, 3-4 ft., \$3.75 each; 3 for \$10.50.

Varieties: **Bartlett, Clapp's Favorite, Duchess, Seckel.**

(For descriptions see standard varieties.)

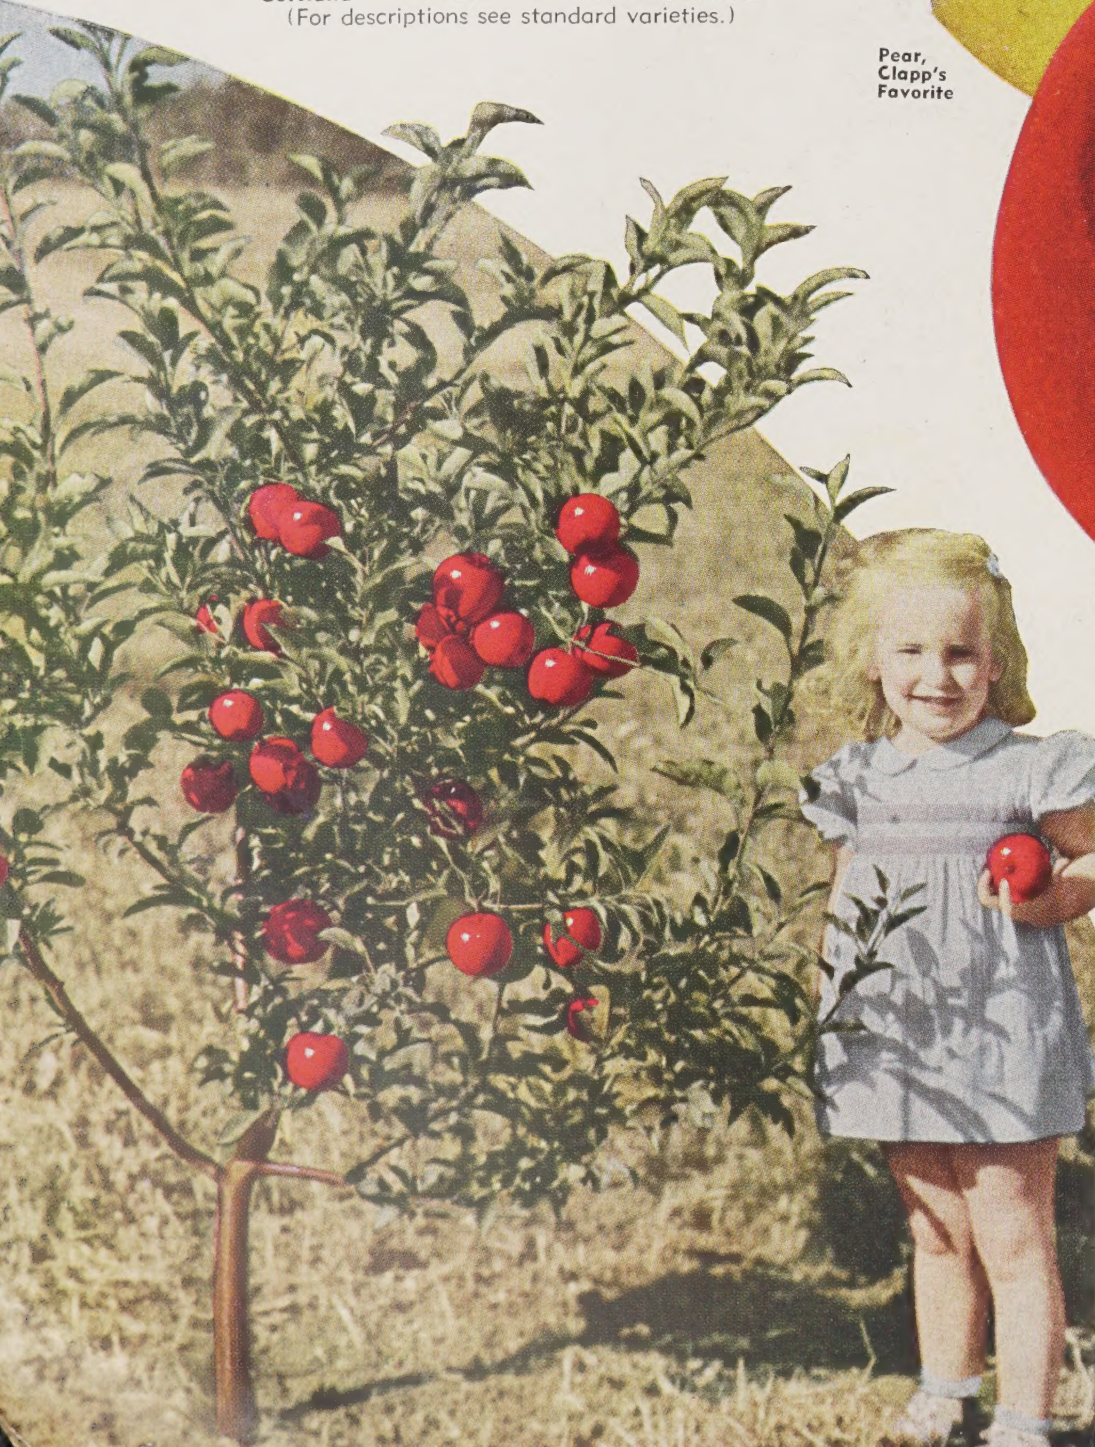

DWARF PLUM TREES

A new addition to our Dwarf Tree line. Like its running mates, the Dwarf Apple and Pear, it is a dwarf tree excellent for the lawn where a small tree is required. The fruit is standard size. Height at maturity 15 ft. Plant 12 ft. apart.

PRICE: 1-yr., large, 2½-3½ ft., \$3.75 each; 3 for \$10.50.

Varieties: **Burbank and Fellenberg.**

(For descriptions see standard varieties.)

Summer Varieties

ANOKA. New. Beautiful red-striped fruit. Good quality, highly recommended. Bears second year after planting. Mid-August.

Early McIntosh For home orchard or commercial use, this is the ideal variety to plant. Tree vigorous grower. It is an annual bearer. Fruit same size, quality and flavor as McIntosh Red. Late August.

Lodi Yellow fruit. Large, vigorous. Mid-August.

RED DUCHESS. Sport of Duchess, same season, quality, etc., only deep red all over. Late July.

RED ASTRACHAN. A good bearer, fruit handsome, large, round, covered with deep crimson. Flesh juicy and tender. Good summer Apple. Early August.

SWEET BOUGH. Pale yellow. Fine for baking. Mid-August.

YELLOW TRANSPARENT. Tree grows upright, hardy, early bearer. Fruit good size. Skin clear, white to pale yellow in color. Flavor very good. Is an excellent cooking Apple known to the housewife everywhere. Early August.

Autumn Varieties

FALL PIPPIN. Large, yellow, tender, juicy and rich. September.

POUND SWEET. (Pumpkin Sweet.) Large, yellow, russet Apple, very sweet. Late September.

RED GRAVENSTEIN. A new red sport. Differs from the old Gravenstein only in the solid dark red color of the fruit. Early September.

Winter Varieties

BALDWIN. Large, red, crisp, juicy. Good eating and cooking Apple. Tree vigorous and productive. December-March.

Cortland Beautiful red Apple, larger than McIntosh. Matures a month later. Excellent quality, keeps late in winter and can be handled and shipped like the hardiest market varieties. Fine for culinary purposes. November-March.

Delicious (Red.) November to April. Flesh juicy, melting.

GALLIA BEAUTY. Solid red, high quality. December-May.

GOLDEN RUSSET. Clear golden russet. November-April.

JONATHAN. Red, highly flavored. Fine commercial variety. Early bearer. November-March.

JONATHAN, DARK RED. For eating fresh, dried, cooked, baked. Skin is rich red all over, long before ripe. A quick seller. Keeps all winter in storage. Jonathan trees bear young and always produce a full and profitable crop. Preferred long-distance shipper. Better quality than common Jonathan. November to March.

MACOUN. Dark red; white fleshed; rich flavor. October-March.

McIntosh Red Valuable, hardy, attractive Apple; good size, nearly covered with red. Flesh white, fine, very tender and refreshing. A good annual bearer, comes into fruiting early. Yields large crops. October-January.

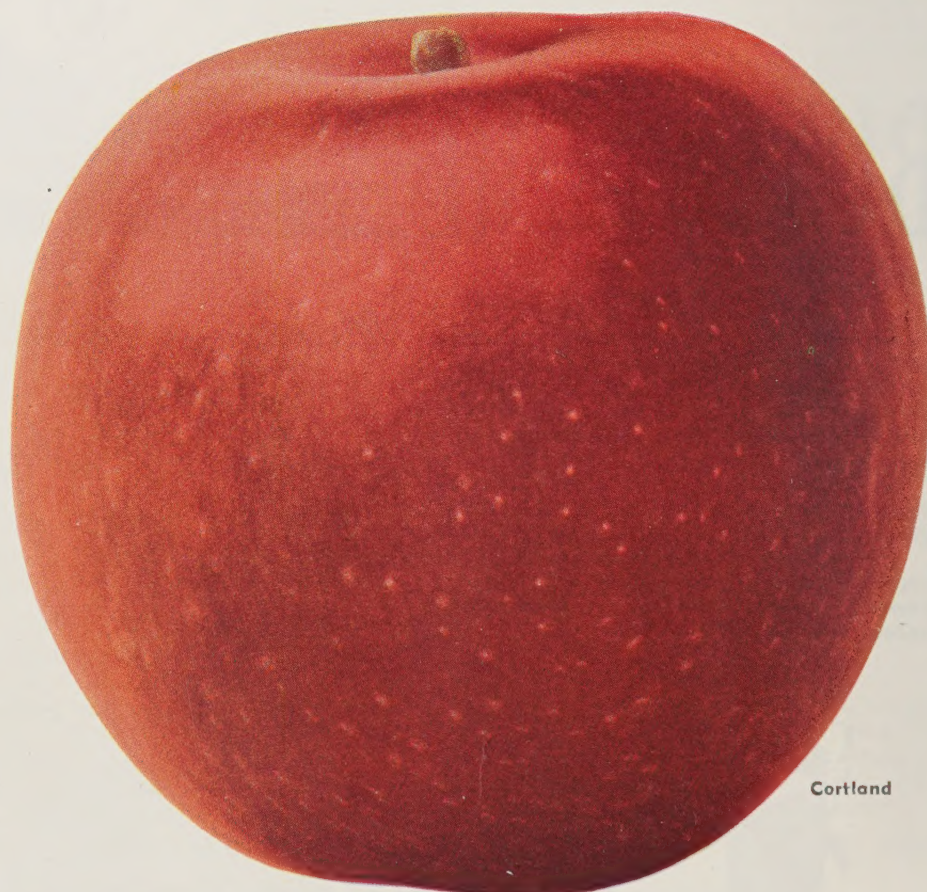

MILTON. McIntosh-like but ripens a month before McIntosh. Fruits pinkish red with heavy bloom; flesh white, tender, crisp, juicy and of McIntosh flavor and aroma. September-October.

Wayne, Pa.,
June 2nd, 1947.

Gentlemen:

Due to the fact that your shipment of both Tulip Trees and Apple Trees were well packed before shipping, every tree arrived at Cochection Erie Railroad Station, Sullivan County, New York, in good condition; and after being planted, grew as though each tree were competing with each other to see which one would grow the fastest. They are all well leaved out now.

Very truly yours,
MISS REBECCA DILWORTH.

Delicious

Yellow Transparent

New Rogers McIntosh Solid red McIntosh, classed as one of the most valuable new fruit introductions in years. Annual bearer. Fruit is the same size as the common McIntosh, but it is not striped. Flesh white, fine grained, very tender, juicy and refreshing. Better quality than common McIntosh and hangs better on tree. October-January.

Double Red Delicious Solid lustrous red without stripes. Fine grained flesh of excellent quality and flavor. A splendid keeper and shipper. Annual bearer, one of the most highly prized winter eating Apples. Everyone should have a few trees of this variety. November-April.

NORTHERN SPY. Hardy, large, red striped. Flesh juicy, crisp, tender. Tree healthy, strong grower. December-March.

Red Northern Spy Red Spy is typical Northern Spy Apple except in color. The Red Spy colors a solid bright red without either stripes or splashes. Very popular winter variety. December-March.

Red Rome Rapidly becoming a leading commercial variety, having the same shape and texture with equal or better quality than Rome Beauty. December-March.

R. I. GREENING. Fruit large and handsome, smooth, dark green overspread with yellow. More highly prized for cooking than any other Apple. Excellent keeper; tree very heavy yielder. December-May.

ROME BEAUTY. Large, round. Red striped. December-March.

STAYMAN RED. Solid red without stripes. Does not crack at stem; crisp and juicy. Will not scald in storage. December-April.

SWEET DELICIOUS. Large and attractive in size. Color yellow and dark red. Fine for dessert and baking. December-April.

TWENTY OUNCE. Very large, yellow striped red, fine quality, good keeper. October-January.

WEALTHY. Red, flesh white, sub-acid. October-January.

YELLOW DELICIOUS. A bright golden yellow Apple. Many say this is the finest yellow Apple. Bears young and heavily. The fruit is large, juicy and of exceptionally fine quality. October-April.

Maloney Apples are all inspected for trueness to name by Professors A. P. French, O. C. Roberts and L. Southwick of the Massachusetts State College, Amherst, Mass.

Maloney's Fine Crab Apples

Nothing Finer for Jell!

DOLGO CRAB. Handsome red Crab Apple. Fruit jellies easily. Early September.

HYSLOP CRAB. Fruit large, deep crimson. Desirable for home use and market. Late September.

YOUNG AMERICA. Attractive red fruits, excellent size and quality. Jelly made from the fruit is a clear, beautiful red and splendidly flavored. Season middle of September. Young America planted as ornamentals as well as for their fruit.

Vitamins in Apples

Without the Vitamins It Would Be Impossible to Maintain Life

Many charts have been prepared which show the amount of vitamins present in different foods. Dr. D. J. Quigley has prepared a chart which shows the effect of the several vitamins on health and nutrition. Among these important properties he lists the following:

Vitamin B

- Increases appetite.
- Promotes digestion.
- Promotes growth by stimulating digestive and other processes.
- Protects and stimulates nerve and brain energy and protects them from certain diseases.
- Increases quantity and quality of milk of nursing mothers.

If vitamin B is not present in sufficient quantities in the daily diet, these results may occur:

- Impairment of appetite and digestion.
- Loss in weight.
- Loss in vigor.
- Constipation, pyorrhea.
- Emaciation.
- Sub-normal temperature.
- Enlargement of adrenals.
- Increase in size and weight of various glands of body, including heart, liver, kidneys, stomach and thyroid.

Various types of impairments to nervous system may also be noted leading to paralysis of groups of muscles, neuritis and atrophy of certain lymphoid tissues throughout the body.

Vitamin C

- Regulating substance, stimulating and aiding digestive processes.
- Builds resistance to disease.
- Lack of vitamin C results in scurvy:
- Reduced hemoglobin content of the blood.
- Reduced secretions.
- Decrease in weight of various organs of body.
- Bleeding gums.
- Swelling and redness of gums.
- Teeth defects.
- Irritability.
- Lack of stamina.
- Retarded growth.
- Low resistance to disease.
- Congestion of internal organs.

These vitamins of such vital importance to health and life are found in their finest form in a food which is nature built and which comes to the table without man-made changes. This food is the apple. Its shape, color, size and chemical composition are all due to its hanging in the summer sunshine long enough to be a finished product, needing nothing "done" to it to make it ready to eat and to be enjoyed. It is a balanced, perfectly-blended mineral, vitamin, bulk and moisture-carrying food which makes it the "King of Fruits."

EMPEROR FRANCIS. Of Napoleon type but better in quality. Fruits similar but redder and becomes darker.

LAMBERT. Large, dark purple, firm, rich, juicy. Late July.

NAPOLEON. (Royal Ann.) Fruit is large, light amber over-toned with red—used for canning and maraschino purposes. Enormous crops. Early July.

Windsor Fruit exceptionally large, juicy and firm; flesh pinkish and sometimes streaked. Good quality and excellent bearer. Tree is a rapid grower, vigorous and upright. Fruit popular for its large size and dark color; almost black. Best commercial variety. Late July.

SCHMIDT'S BIGGAREAU. The fruit is of very large size, of deep mahogany color. Flesh dark, tender, very juicy, with a fine rich flavor. Is an excellent shipper and one of the best for sauce. Mid-July.

SWEET SEPTEMBER. The fruits are an attractive medium dark red similar to the Windsor, deliciously sweet; excellent for eating fresh or canning. Ripens about September 1st. Hangs on trees about three weeks after ripening. **PRICE:** 2-yr., 5-6 ft., \$3.00 each; 5 for \$14.25. 2-yr., 4-5 ft., \$2.50 each; 5 for \$11.75.

DELICIOUS BERRIES

The New Sensational Youngberry

**Hardy, Sweet, Delicious, Tremendous Bearer
Mid-July**

This new fruit, a cross of the Loganberry and the Dewberry, has become very popular, planted from coast to coast. It has such a wonderful flavor, delicious to eat fresh, and makes the finest sauce you ever tasted. The fruit is very large, a handsome dark wine-red color, sweet and delicious, highly flavored, almost seedless. A tremendous bearer. It is a very easy plant to grow. No other fruit has become so popular in such a short time. North of Missouri it should be covered over winter. This can be easily done with straw, leaves and a little dirt. Plant some this spring; you are sure to like them.

BLACKBERRIES

Are Delicious When Picked or When Frozen or Canned

Blackberries are easily grown and bear abundantly. They grow almost any place, even on a rough, steep hillside. What is more appetizing than a piece of Blackberry pie or a dish of juicy, sweet Blackberries and cream?

We send you Select No. 1 plants grown from root cuttings. These are much superior to cheap plants from suckers. A straw mulch is fine for Blackberries and Raspberries. It holds moisture in summer, prevents weeds and eliminates cultivating.

ALFRED. Excellent flavor; very firm, large berries, size holds up well to the end of the picking season. Practically free from seeds. Plant is a thrifty grower, extremely hardy, bears young; suitable for home or market use. Early July.

BLOWERS. Large, jet-black. Hardy and productive. Starts to ripen in July and continues late.

ELDORADO. Our most popular variety. The sparkling jet-black berries are very large, sweet and delicious, and practically coreless. The plant is extremely hardy and vigorous, and a regular heavy bearer.

PRICE: 1-yr., No. 1, selected rooted cuttings, 25 for \$3.30; 50 for \$5.70; 100 for \$9.90; 500 for \$34.50.

Roses, Trees, Plants and
Fruit Trees

Direct from

MALONEY'S

No. 1 Because every order received by mail is a direct responsibility of the Maloney Nurseries, every precaution is taken to select only first quality trees and plants that are disease free and true to name.

No. 2 Because we have hundreds of acres of "northern grown trees and plants" that have proved hardier to our customers throughout the United States. We have shipped more nursery stock direct to customers than most other firms in the country. Our northern grown stock is tough, healthy, and dependable. It is the kind that "takes hold" quickly in a new location.

No. 3 Because we believe the success of our superior strains has done more than anything else to create and hold the confidence of our customers throughout our sixty-four years in the nursery business. Our plants and trees grow perfectly in all parts of this country and the bulk of sales are made to homes and farm gardeners who specialize in home beautification or fruit growing.

No. 4 Because we guarantee to deliver stock in good condition, up to grade and specification, with a provision for replacement or money refunded if you receive nursery stock not as represented.

No. 5 Because this helpful and comprehensive book offers only the best selections in plant life at moderate prices and furnishes thousands of our friends and customers with valuable information.

ONE OF MALONEY'S "NURSERIES ON THE HILL"

This top of the hill nursery develops and grows the hardiest fruit trees. The young Apple tree planting must withstand the extreme cold and bleak winter weather and be carefully graded before shipment to our customers.

All Mail Orders are packed and shipped from interior weather-conditioned storage cellars, temperature controlled to keep plants dormant.

SENSATIONAL *Thornless Boysenberry*

PRICE: 2-yr., extra large, No. 1 plants, 3 for \$1.65; 6 for \$2.70; 10 for \$3.50; 25 for \$6.75. 1-yr., No. 1 selected plants, 3 for \$1.30; 6 for \$2.35; 10 for \$3.05; 25 for \$5.90.

This amazing new berry has the same big, juicy, delicious fruit as the regular Boysenberry. The vines are absolutely **thornless**, making the cultivation of same and picking easy. They can be trained to a trellis or wire. Late July.

HOW TO GROW BOYSENBERRIES

Set plants 8 by 8 ft. in and between rows. Let the vines creep on the ground the first year. To be safe, cover the plants with straw, leaves or soil before heavy frosts. When the buds appear, tie the vines to the wire or trellis about 2½ ft. above the ground. After fruiting, cut the plants to the ground and burn vines. Repeat this practice every year.

The *Mammoth* BOYSENBERRY

A "Whopper" of a Berry—Often Measuring an Inch Across

PRICE: 2-yr., extra large, No. 1 plants, 3 for \$1.50; 6 for \$2.40; 10 for \$3.00; 25 for \$5.50. 1-yr. No. 1 selected plants, 3 for \$1.15; 6 for \$2.05; 10 for \$2.55; 25 for \$4.65.

This is the berry which has created such a sensation throughout the United States. A tremendous bearer of immense berries often 1½ to 2 inches long, of the highest quality. No matter whether used fresh or canned, or in pies or jelly, it stands supreme. No other berry has ever been received so enthusiastically or planted so widely. Late July.

With some protection where the thermometer drops more than 10 degrees below zero, they can be grown almost anywhere other berries can be successfully grown.

For field culture spacing 8 feet apart in the rows with rows 8 feet apart is recommended. In smaller plots this may be varied to suit local conditions but plants should not be set closer than 6 feet in the rows.

These plants are strong, extra large, 2 years old. Will take hold at once and produce heavily the second year.

Plant the same as any Raspberry plant. Then, when the shoot appears cover with 1 inch of soil and when the shoot has grown up through this soil, apply another inch and repeat once or twice more.

Cultivated Blueberries

and How to Grow Them

These giant, cultivated Blueberries are the result of scientific breeding by State Experimental Stations and are far superior to the ordinary wild Blueberries. Two to six bushes in your garden will furnish your family plenty of berries for fresh pies and canning. Highly profitable when grown for market.

Two different varieties should be planted to pollenate.

Blueberries can be planted in any good garden soil. Should bear first year after planting.

CABOT. The earliest variety to ripen. Berries have a delicious sub-acid flavor. Plants seldom exceed 3 feet in height, making a broad, low bush.

CONCORD. High bush, berries large, well flavored, and attractive in appearance. Midseason.

RANCOCAS. Upright grower, vigorous, hardy; fruit very fine flavor. Fruit medium to large size. Sets very heavy crop of fruit buds. Midseason.

JERSEY. Tall, nice shaped bush of attractive appearance. A good producer. Berries are large and of good quality. Late.

You Can Grow Blueberries

In your garden and have plenty of big, luscious berries for your table, for pies, muffins, etc.

And they are as easily grown as any ordinary shrub or Rose bush. For quick returns plant our ready-to-bear bushes.

The Berries

Look at those **big, beautiful** berries picked from a Cultivated Blueberry bush! Over five times as large as wild ones. And they are just as **sweet, luscious, and tasty** as they are big.

Streamliner

Strawberries are shipped separate from all other nursery stock by parcel post.

June Bearing Strawberries

PRICES: Postpaid or Express Prepaid (except as noted), 25 for \$1.30; 50 for \$2.10; 100 for \$3.25; 250 for \$6.50; 500 for \$10.25; 1000 for \$16.50.

BLAKEMORE. A big, hardy, strong grower; produces big crops of large, round, sparkling solid berries. Solid red from surface to center. Exceedingly beautiful. Excellent for home garden or for market.

DORSETT. Released for introduction by the U. S. Department of Agriculture, spring 1933. Color is bright red. Berries very large; flavor superior to other early berries. Can be classed among the best.

FAIRFAX. Released for introduction by the U. S. Department of Agriculture, spring of 1933. Fruit ripens uniformly along with Premier; long fruiting season. Quality unexcelled. Berries are very large, bright red color at picking time, turning to dark red. Fairfax should be planted for both home and commercial use.

PREMIER. Perfectly flavored. It is smooth and large; its color is the commanding glossy red which sells on sight. Early.

ROBINSON. The new Robinson originated in the heart of the Strawberry growing section of Michigan, and is rapidly growing in popularity. It brought a premium on the market due to its scarlet-red color and unusual firmness. It is a vigorous grower. Midseason.

Home Evergreens

All Evergreens are taken up expertly to secure the tender roots, the soil removed, and then the roots dipped in Transplantone and balled and burlapped in wet moss. By this method we are now able to eliminate 50 to 60 pounds of soil, making low cost express shipments possible. This method also insures excellent growth and quicker root action. In planting, remove burlap and use peat moss in hole around roots.

All Evergreens are shipped separate from other orders because they are late in maturing.

Add Charm to Your Garden by Planting Maloney's Flowering and Berried SHRUBS

See prices on page 31 (except as noted).

The first indications that the plants are waking from winter slumber arouses renewed enthusiasm in garden making. Forsythias are inevitably associated with the first days of spring, for they are among the earliest of Mother Nature's children to announce the coming of spring. The warm air, the return of the birds, and the garden's change of costume from dull winter grays and browns to the tender green and fresh new growth, inspires the making plans for beautiful outdoor surroundings.

Honeysuckle
Zabelii

HONEYSUCKLE ZABELLI

6 ft. A marvelous new red Honeysuckle; the most shapely bush of any of the type. Glossy deep green foliage enhances the unsurpassed glowing red flowers, marked with the deep golden yellow stamens. A heavy bloomer and the brilliant red fruits last throughout the summer. **Price, 2-3 ft., \$1.25 each; 3-4 ft., \$1.50 each.**

Spirea Macrothyrsa

SPIREA MACROTHYRSA

This is without doubt the finest pink Spirea ever introduced. The enormous spikes of cameo-pink flowers up to 12 inches long, are produced on strong, willowy stems up to 4 feet long. Clusters of secondary spikes follow after cutting and by trimming out the old flowers, the plant can be made to bloom all summer until late September. **Price: 2-3 ft., \$1.25 each; 3-4 ft., \$1.50 each.**

BLUE HYDRANGEA

Dominant large blue blossoms that literally cover the whole shrub when in bloom. Same characteristics as the Hydrangea Hills of Snow except the blossoms are blue instead of white. **Price: \$2.00 each.**

Hansen Bush Cherry

The New Quick-Bearing Cherry—Highly Productive—Good Flavor—EASY TO GROW—SURE TO PRODUCE—HARDY EVERYWHERE

Though the fruit of this new Cherry much resembles a Plum in size and shape, it comes massed in clusters and at times almost completely covers the limbs. The tree grows in a dwarf bushlike shape rarely getting over 4 to 5 feet tall. Fruit is sour. Also of striking ornamental value.

Plant Hansen Bush Cherries Because:

1. They are so easy to grow and are perfectly hardy everywhere.
2. Are good to eat fresh, and make delicious preserves.
3. Bear from the ground up, early, heavily, and annually.
4. Are dwarf growing, bushy, take up little room.
5. Excellent for hedges, ornamental shrubs and erosion control.

PRICE: 3-yr., fruiting age, 75c each; 2 for \$1.45.
